

Supply and Installation of FEP and PFA Heat Shrinkable Sleeves ANTI-ADHERENCE ET ANTI-CORROSION ON CYLINDERS

Heat Shrinkable Sleeves supply

Web guide roller

Sleeves installation on aluminium rolls

Applications in Paper Industry :

- Machine paper rolls
- Transport rollers
- Guide rollers, calendering, pressure...
- Bowed, slotted, choke rolls

Applications Industrie Textile :

- Right or bowed rolls for coating, mercerizing, spinning, dyeing, printing, lamination, finish, sizing, rotary and guide press...
- Detour cylinders, hoppers, cones recycling...

Benefits :

- Excellent anti-adherence and anti-corrosion properties
- Good thermal and chemical resistance
- Protects the roll surface
- Increases your production rate and improves the life of your equipment
- Avoids the jam and bonding on the rollers
- Anti-static PFA sleeves on request
- Non-flammable : ideal for high temperature applications (FEP : 204°C ; PFA : 249°C)
- Increases the life of rolls
- Standards (beyond on request) :
Thickness de 0,5 à 3 mm ;
Diameter de 25,4 à 660mm
Length maxi : 10m
